History

Ver	Auth	Edit date	Changes	
1.0.0	XiaoJinsheng	2012-11-21	V1.0.0	
1.0.1	Houzhen	2012-12-09	Add the following CGI command to set PT	
			startup position:	
			1) setPTZSelfTestMode	
			2) getPTZSelfTestMode	
			3) setPTZPrePointForSelfTest	
			4) getPTZPrePointForSelfTest	
1.0.2	XiaoJinsheng	2013-01-29	1. Add a snap CGI(snapPicture2) which	
			retrun jpeg image data directly but a	
			image url	
			Add MotionJpeg stream support	
1.0.3	Houzhen	2013-6-5	Check and Modify CGI command	
			document	
1.0.4	Limaike	2013-6-8	CGI command check	
1.0.5	Houzhen	2013-9-25	1.Add note for GetMJStream, defects of	
			Firefox;	
			2.Modify Command:	
			setContrast、mirrorVideo、flipVideo、logIn、	
			setSnapConfig setPTZSpeed setP	
			setInfraLedConfig 、 setSubStreamFormat 、	
			setPortInfo, getPortInfo;	
			3.Add command:	
			getLocalAlarmRecordConfig ;	
			setLocalAlarmRecordConfig;	
			getP2PEnable; setP2PEnable; getP2PPort;	
			setP2PPort; setOSDMask; getOSDMask;	
			getScheduleSnapConfig ;	
			setScheduleSnapConfig;	
1.0.6	Houzhen	2013-12-12	1.Add command:	
			-changeUserNameAndPwdTogether;	
			-getPCAudioAlarmCfg;	
			-setPCAudioAlarmCfg;	
			-setH264FrmRefMode;	
			-getH264FrmRefMode;	
			-setCruiseTime;	
			-getCruiseTime;	

			getSnapConfig, setSnapConfig.
1.0.7	I IUUZIICII	2013-12-14	1. The usage of command-setSubStreamFormat,
1.0.7	Houzhen	2013-12-14	Modify Command:
			2.Modify Login error code-5 -7;
			-getScheduleInfraLedConfig;
			-setScheduleInfraLedConfig;
			-toolResetToFactory;
			-getGeneratePubKey;
			-getProductAllInfo;
			-getProductTalkFlag; -getProductAppVer;
			-getProductAudioFlag;
			-getProductWpsFlag;
			-getProductP2pFlag;
			-getProductOnvifFlag;
			-getProductRs485Flag; -getProductIoAlarmFlag;
			-getProductZoomFlag;
			-getProductPtFlag;

			2.The	example	and	description	of
			commar	nd-setMotion	DetectC	lonfig,	
			setScheo	duleSnapCon	ıfig, setI	OAlarmConfig	
1.0.8	Houzhen	2014-1-17	1.Add c	ommmad:			
			getRec	ordList2,rel	oadRec	ordindex	

General description

 Our device can only support authentication by pass user name or password attached at CGI request string currentlly.

For example:

http://192.168.1.2/cgi-bin/CGIProxy.fcgi&usr=admin&pwd=123&cmd=ABC

- We only support GET and POST method. Only importConfig and fwUpgrade can support POST method.
- The cgi request string must be encode in url format. URL encode rule:

The following chars will not be encoded:

The other chars will be encoded into hex format.

For example:

http://192.168.1.6:88/cgi-bin/CGIProxy.fcgi?usr=admin&pwd=&cmd=getIPInfo

will be encode to:

http://192.168.1.6:88/cgi-bin/CGIProxy.fcgi?usr%3Dadmin%26pwd%3D%26cmd%3DgetIPInfo

- cgi execute result
 - 1) We orgnize the cgi execute result as xml format, for example:

<result></result> means the common execute result

value	mean
0	Success
-1	CGI request string format error
-2	Username or password error
-3	Access deny
-4	CGI execute fail
-5	Timeout
-6	Reserve
-7	Unknown error
-8	Reserve

AV Function

getImageSetting

Function	Get color attribute of video	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getIr	mageSetting
Param	None	
Return	brightness	0~100
	contrast	0~100
	hue	0~100
	saturation	0~100
	sharpness	0~100
	denoiseLevel	Not use
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getImageSetting&usr=admin&pwd=	

setBrightness

Function	Set brightness of video	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setBrightness	
Param	brightness 0~100	
Return	None	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=setBrightness&brightness=50&usr=admin&pwd=	

setContrast

Function	Set contrast of video	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setContrast	
Param	contrast 0~100	
Return	None	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=setContrast&constrast=50&usr=admin&pwd=	

setHue

Function	Set hue of video	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setHue	
Param	hue	0~100
Return	None	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=setHue&hue=50&usr=admin&pwd=	

setSaturation

Function	Set saturation of video	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setSaturation	
Param	saturation	0~100
Return	None	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=setSaturation&saturation=50&usr=admin&pwd=	

setSharpness

Function	Set sharpness of video	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setSharpness	
Param	sharpness	0~100
Return	None	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=setSh	narpness&sharpness=50&usr=admin&pwd=

resetImageSetting

Function	Reset color parameters to default value
privilege	admin
Usage	/cgi-bin/CGIProxy.fcgi?cmd=resetImageSetting
Param	None

Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=resetImageSetting&usr=admin&pwd=

${\bf get Mirror And Flip Setting}$

Function	Get mirror and flip attribute of video	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getMirrorAndFlipSetting	
Param	None	
Return	isMirror	0 Not mirred
		1 Mirred
	isFlip	0 Not filpped
		1 Flipped
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getMirrorAndFlipSetting&usr=admin&pwd=	

mirrorVideo

Function	Mirror video	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=mirrorVideo	
Param	isMirror	0 Not mirror
		1 Mirror
Return	None	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=mirrorVideo&isMirror=1&usr=admin&pwd=	

flipVideo

Function	Flip video		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=flipVideo		
Param	isFlip	0	Not flip
		1	Flip

Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=flipVideo&isFlip=1&usr=admin&pwd=

getH264FrmRefMode

Function	Get frame shipping reference mode of H264 encode stream	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getH264FrmRefMode	
Param	None	
Return	mode	0 Normal reference mode
		1 Two frames are separated by four skipping
		frames
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getH264FrmRefMode&usr=admin&pwd=	

setH264FrmRefMode

Function	Set frame shipping reference mode of H264 encode stream	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setH264FrmRefMode	
Param	mode	0 Normal reference mode
		1 Two frames are separated by four skipping
		frames
Return	None	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmc	l=setH264FrmRefMode&mode=0&usr=admin&pwd=

getScheduleRecordStreamChn

Function	Get stream channel for schedule record	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getScheduleRecordStreamChn	
Param	None	
Return	chn	0 main stream
		1 sub stream

Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=getScheduleRecordStreamChn&usr=admin&pwd=

setScheduleRecordStreamChn

Function	Set stream channel for schedule record				
privilege	admin				
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setScheduleRecordStreamChn				
Param	chn	chn 0 main stream			
		1 sub stream			
Return	None				
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=setScheduleRecordStreamChn&chn=0&usr=admin				
	&pwd=				

setPwrFreq

Function	Set power freq of sensor		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setPwrFreq		
Param	freq	0 60HZ	
		1 50HZ	
Return	None		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setPwrFreq&freq=0&usr=admin&pwd=		

getVideoStreamParam

Function	Get video stream param			
privilege	visitor	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cm	d=getVideoStreamParam		
Param	None			
Return	resolutionN Resolution of stream type N			
	bitRateN Bit rate of stream type N (20480~2097152)			
	frameRateN Frame rate of stream type N			
	GOPN P frames between I frame of stream type N			

	isVBRN	Not in use currentlly	
Note	N means streamType [0~3]		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getVideoStreamParam&usr=admin&pwd=		

setVideoStreamParam

Function	Set the video stream param of stream N				
privilege	admin				
Usage	/cgi-bin/CGIProxy.	fcgi?cmd=setVideoStreamParam			
Param	streamType	0~3			
	resolution	Resolution of stream type N			
	bitRate				
	frameRate Frame rate of stream type N				
	GOP	P frames between I frame of stream type N			
		The suggest value is: X * frameRate Not in use currentlly			
	isVBR				
Return	None				
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=setVideoStreamParam&streamType=0&resolution=				
	0&bitRate=2097152&frameRate=30&GOP=30&isVBR=0&usr=admin&pwd=				

getSubVideoStreamParam

Function	Get sub video stream param				
privilege	visitor				
Usage	/cgi-bin/CGIProxy.fcgi?cmc	d=getSubVideoStreamParam			
Param	None	None			
Return	resolutionN	resolutionN Resolution of stream type N			
	bitRateN Bit rate of stream type N (20480~2097152)				
	frameRateN Frame rate of stream type N				
	GOPN P frames between I frame of stream type N				
	isVBRN Not in use currentlly				
Note	N means streamType [0~3]				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getSubVideoStreamParam&usr=admin&pwd=				

setSubVideoStreamParam

Function	Set the sub video stream param of stream N			
privilege	admin			
Usage	/cgi-bin/CGIProxy.f	fcgi?cmd=setSubVideoStreamParam		
Param	streamType	0~3		
	resolution	Resolution of stream type N		
	bitRate	Bit rate of stream type N (20480~2097152)		
	frameRate Frame rate of stream type N			
	GOP	P frames between I frame of stream type N		
		The suggest value is: X * frameRate Not in use currentlly		
	isVBR			
Return	None			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=setSubVideoStreamParam&streamType=0&resoluti			
	on=0&bitRate=2097152&frameRate=30&GOP=30&isVBR=0&usr=admin&pwd=			

getMainVideoStreamType

Function	Get the stream type of main stream			
privilege	visitor			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getMainVideoStreamType			
Param	None			
Return	streamType The stream type 0~3			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getMainVideoStreamType&usr=admin&pwd=			

getSubVideoStreamType

Function	Get the stream type of sub stream			
privilege	visitor			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getSubVideoStreamType			
Param	None			
Return	streamType The stream type 0~3			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getSubVideoStreamType&usr=admin&pwd=			

setMainVideoStreamType

Function	Set the stream type of main stream			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setMainVideoStreamType			
Param	streamType The stream type 0~3			
Return	None			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=setMainVideoStreamType&streamType=0&usr=ad			
	min&pwd=			

setSubStreamFormat

Function	Set the stream format of sub stream		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cr	nd=setSub	StreamFormat
Param	format	0	H264
		1	MotionJpeg
Return	None		
Note	Our device can only support 2 streams:Main stream for PC access and Sub stream for mobile access, but someone need a MJ stream to embed their camera into a webpage, in this case, we should set sub stream format to Motion Jpeg, and then you can get MJ stream by command: /cgi-bin/CGIStream.cgi?cmd=GetMJStream, but when you login as a sub stream user, the stream data will be same as main stream.		
Example	/cgi-bin/CGIProxy.fcgi?cmd=setSubStreamFormat&format=0&usr=admin&pwd=		

GetMJStream

Function	Get motion jpeg stream	
privilege	visitor	
Usage	/cgi-bin/CGIStream.cgi?cmd=GetMJStream	
Param	None	
Return	Motion jpeg stream data	
Note	Motion jpeg stream data is returned from http server by a serverpush mode	
	2) MJ stream is VGA resolution @ 15fps	
	3) For some version of Firefox browse, the Firefox will crash when use	

"GetMJStream" CGI to get mjstream long time. This problem is due to the browse has some defects, it can not parse data correctly and directly. In order to fix this problem, we should as follows: A. Create a .txt empty document, such as "MJ.txt". B.Input the content into you .txt document, as follows: <html> <body> </body> </html> Note: please change the ip\port\usr\pwd to youself; C. Rename your .txt to .html, such as "MJ.html". D. Open you r.html by Firefox, and enjoy your MJStream-video; /cgi-bin/CGIStream.cgi?cmd=GetMJStream&usr=admin&pwd= Example

getOSDSetting

Function	Get OSD config		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cm	d=getOSDSetting	
Param	None		
Return	isEnableTimeStamp Time stamp will display on screen or not		
	isEnableDevName	Camera name will display on screen or not	
	dispPos OSD display position, currently can only be 0		
	isEnableOSDMask Is OSD mask effective		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getOSDSetting&usr=admin&pwd=		

setOSDSetting

Function	Set OSD config		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setOSDSetting		
Param	isEnableTimeStamp Time stamp will display on screen or not		
	isEnableDevName Camera name will display on screen or not		

	dispPos	OSD display position, currently can only be 0	
	isEnableOSDMask	Is OSD mask effective	
Return	None		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setOSDSetting&isEnableTimeStamp=1&isEnableD		
	evName=1&dispPos=0&isEnableOSDMask=0&usr=admin&pwd=		

getOsdMaskArea

Function	Get OSD mask area info		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getOsdMaskArea		
Param	None		
Return	x1_N The top left X position of mask N		
	y1_N The top left Y position of mask N		
	x2_N The bottom right X position of mask N		
	y2_N The bottom right Y position of mask N		
Note	Our device can only support 4 mask areas		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getOsdMaskArea&usr=admin&pwd=		

setOsdMaskArea

Function	Set OSD mask area info			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=	-setOsdMaskArea		
param	x1_N	The top left X position of mask N		
	y1_N	The top left Y position of mask N		
	x2_N The bottom right X position of mask N			
	y2_N The bottom right Y position of mask N			
Resturn	None			
Note	Our device can only support 4 mask areas			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setOsdMaskArea&x1_0=100&y1_0=100&x2_0=20			
	0&y2_0=200&x1_1=0&y1_1=0&x2_1=0&y2_1=0&x1_2=0&y1_2=0&x2_2=0&y			
	2_2=0&x1_3=0&y1_3=0&x2_3=0&y2_3=0&usr=admin&pwd=			

getOSDMask

Function	Get OSD mask status	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getOSDMask	
Param	None	
Return	isEnableOSDMask 0-Disable, 1-Enable	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getOSDMask&usr=admin&pwd=	

setOSDMask

Function	Set OSD mask status			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setOSDMask			
Param	i sEnableOSDMask 0-Disable, 1-Enable			
Return	None			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=setOSDMask&isEnableOSDMask=1&usr=admin&p			
	wd=			

getMotionDetectConfig

Function	Get motion detect config		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=	aetMotionDetectConfia	
Param	None	<u> </u>	
Return	isEnable	Is enable motion detect a	alarm
	linkage	Motion alarm linkage	bit0:Ring
		(bit3 bit2 bit1 bit0)	bit1:Send mail
			bit2:Snap picture
			bit3:Record
	snapInterval	The interval time to sna	p picture again
	sensitivity	Motion detect	0 : Low
		sensitivity	1: Normal
			2: High
			3: Lower

			4: Lowest
	triggerInterval	The time of which motion detect alaram can trigger again when a motion detection has happened.	
	scheduleN	The motion alaram sched	ule of one week,
		N = 0(Monday) ~6(Sunda	y)
		For detail, see *1 bellow	
	areaN	The area info of row N	
		For detail, see *2 bellow	
Note	·Video region is divided into 10*10 sub areasideo region is divided into 10*10 sub areas		
	·The min unit of schedule is half an hour, scheduleN value range		
	$2^{N} - 1(N[0-48])$		
	areaN value 2 ^N -1 (N[0-10]	.areaN value $2^N - 1$ (N[0-10])	
Example	/cgi-bin/CGIProxy.fcgi?cmd=getMotionDetectConfig&usr=admin&pwd=		

setMotionDetectConfig

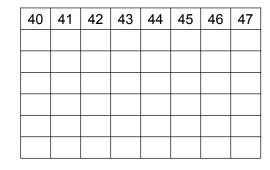

Function	Set motion detect config		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setMotionDetectConfig		
Param	isEnable	Is enable motion detect alarm	
	linkage	Motion alarm linkage	bit0:Ring
		(bit3 bit2 bit1 bit0)	bit1:Send mail
			bit2:Snap picture
			bit3:Record
snapInterval The interval time to snap pict		p picture again	
	sensitivity	Motion detect	0 : Low
		sensitivity	1: Normal
			2: High
			3: Lower
			4: Lowest
	triggerInterval	The time of which mo	otion detect alaram
		can trigger again who	en a motion
		detection has happened.	
	scheduleN	The motion alaram sched	dule of one week,
		N = 0(Monday) ~6(Sunda	ay)
		For detail, see *1 bellow	

	areaN	The area info of row N
		For detail, see *2 bellow
Return	None	
Note	sub areas $ \begin{array}{ccccccccccccccccccccccccccccccccccc$	10*10 sub areasideo region is divided into 10*10 ule is half an hour, scheduleN value range
Example	.areaN value 2^N -1 (N[0-10]) /cgi-bin/CGIProxy.fcgi?cmd=setMotionDetectConfig&isEnable=1&linkage=16&s napInterval=2&sensitivity=1&triggerInterval=5&schedule0=1023&schedule1=1 023&schedule2=1023&schedule3=1023&schedule4=1023&schedule5=1023&schedule6=1023&area0=1023&area1=1023&area2=1023&area3=1023&area4= 1023&area5=1023&area6=1023&area7=1023&area7=1023&area8=1023&area9=1023&area8	

*1 schedule bitmap

0	1	2	3	4	5	6	7

Monday
Tuesday
Wednesday
Thursday
Friday
Saturday
Sunday

Each grid of a row presents half of an hour of one day. For example, 40 presents 20:00 ~20:30.

The bit 40 set to "1" means the motion detection is effective between 20:00 to 20:30

*2 area bitmap

area0	bit9	bit8	bit7	bit6	bit5	bit4	bit3	bit2	bit1	bit0
area										
area2										
area										
area4										
areas										
area										
area										
areas										
areas										

The video region is divided into 10*10 sub areas, bit0 above present the first area, when this bit is set to "1", it means motion detection is effective on this area.

setLocalAlarmRecordConfig

Function	Set local alarm-record config				
privilege	admin				
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setLocalAlarmRecordConfig				
Param	isEnableLocalAlar 0 Disable		Disable		
	mRecord	1	Enable		
	localAlarmRecordS	Recording time			
	ecs				
Return	None				
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=setLocalAlarmRecordConfig&isEnableLocalAlarmR				
	ecord=1&localAlarmRecordSecs=30&usr=admin&pwd=				

getLocalAlarmRecordConfig

Function	Get local alarm-record config		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getLocalAlarmRecordConfig		
Param	None		
Return	isEnableLocalAlar	0	Disable
	mRecord	1	Enable
	localAlarmRecordS	Recordir	ng time
	ecs		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getLocalAlarmRecordConfig&usr=admin&pwd=		

getSnapConfig

Function	Get snap config			
privilege	visitor			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getSnapConfig			
Param	None			
Return	snapPicQuality	0	Low quality	
		1	Normal quality	

		2	High quality
	saveLocation	0	Save to sd card
		1	Not in use now
		2	Upload to FTP
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getSnapConfig&usr=admin&pwd=		

setSnapConfig

Function	Set snap config				
privilege	admin				
Usage	/cgi-bin/CGIProxy.fcgi?d	md=setSr	napConfig		
Param	snapPicQuality 0 Low quality				
		1	Normal quality		
		2	High quality		
	saveLocation	0	Save to sd card		
		1	Not in use now		
		2	Upload to FTP		
Return	None				
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=setSnapConfig&snapPicQuality=1&saveLocation				
	=2&usr=admin&pwd=				

getScheduleSnapConfig

Function	Get schedule snap config					
privilege	visitor	visitor				
Usage	/cgi-bin/CGIProxy.fcgi?cmd=	/cgi-bin/CGIProxy.fcgi?cmd=getScheduleSnapConfig				
Param	None					
Return	isEnable	Is enable motion detect alarm				
	snapInterval	The interval time to snap picture again				
	scheduleN	The motion alaram schedule of one week,				
		N = 0(Monday) ~6(Sunday)				
	For detail, see *1 bellow					
Note	The min unit of schedule is half an hour, scheduleN value range					
	$2^{N} - 1 (N[0-48])$					
Example	/cgi-bin/CGIProxy.fcgi?cmd=getScheduleSnapConfig&usr=admin&pwd=					

setScheduleSnapConfig

Function	Set schedule snap config				
privilege	admin				
Usage	/cgi-bin/CGIProxy.fcgi?cmd=	setScheduleSnapConfig			
Param	isEnable Is enable snap				
	snapInterval	The interval time to snap picture again			
	scheduleN	The motion alaram schedule of one week,			
		N = 0(Monday) ~6(Sunday)			
		For detail, see *1 bellow			
Return	None				
Note	The min unit of schedute $2^N - 1$ (N[0-48])	ule is half an hour, scheduleN value range			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setScheduleSnapConfig&isEnable=1&snapInterva				
	l=2&schedule0=1023&schedule1=1023&schedule2=1023&schedule3=1023≻				
	hedule4=1023&schedule5=1	023&schedule6=1023&usr=admin&pwd=			

*1 schedule bitmap

0	1	2	3	4	5	6	7

40	41	42	43	44	45	46	47

Monday
Tuesday
Wednesday
Thursday
Friday
Saturday
Sunday

Each grid of a row presents half of an hour of one day. For example, 40 presents 20:00 ~20:30.

The bit 40 set to "1" means the snap is effective between 20:00 to 20:30

snapPicture

Function	Manual snap picture
privilege	visitor
Usage	/cgi-bin/CGIProxy.fcgi?cmd=snapPicture
Param	None
Return	We will return a html script directly:

	<a 20121121-215939.jpg"="" href="html><body>
Note	Picture resolution is the same as main stream resolutionnapPicture
Example	/cgi-bin/CGIProxy.fcgi?cmd=snapPicture&usr=admin&pwd=

snapPicture2

Function	Manual snap picture
privilege	visitor
Usage	/cgi-bin/CGIProxy.fcgi?cmd=snapPicture2
Param	None
Return	Jpeg image data
Note	This command will return jpeg image data directly
Example	/cgi-bin/CGIProxy.fcgi?cmd=snapPicture2&usr=admin&pwd=

getRecordList

Function	Get record list			
privilege	visitor			
Usage	/cgi-bin/CGIProxy.fcg	i?cmd=getRecordList		
Param	recordPath	Record path		
	startTime	Start time for research		
	endTime End time for research			
	recordType	Recort type		
	startNo	Start no		
Return	totalCnt	Total record count		
	curCnt	Current record count		
	recordN	N(0-9), Record information		
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getRecordList&usr=admin&pwd=			

getRecordList2

Function	Get record list		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getRecordList2		
Param	recordPath Record path		
	startTime	Start time for research	

	endTime	End time for research
	recordType	Recort type
	startNo	Start no
Return	totalCnt	Total record count
	curCnt	Current record count
	recordN	N(0-9), Record information
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getRecordList2&usr=admin&pwd=	

reloadRecordindex

Function	Synchronization of record index for Play
privilege	visitor
Usage	/cgi-bin/CGIProxy.fcgi?cmd=reloadRecordindex
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=reloadRecordindex&usr=admin&pwd=

getAlarmRecordConfig

Function	Get alarm record config		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcg	/cgi-bin/CGIProxy.fcgi?cmd=getAlarmRecordConfig	
Param	None		
Return	isEnablePreRec	Preview record state	
	ord		
	preRecordSecs	Preview record time	
	alarmRecordSec	Alarm record time	
	S		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getAlarmRecordConfig&usr=admin&pwd=		

setAlarmRecordConfig

Function	Set alarm record config	
privilege	admin	

Usage	/cgi-bin/CGIProxy.fcgi?cmd=setAlarmRecordConfig			
Param	isEnablePreRec	Preview record state		
	ord			
	preRecordSecs	Preview record time		
	alarmRecordSec	Alarm record time		
	S			
Return	Set result(0-success,-1-error)			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=setAlarmRecordConfig&usr=admin&pwd=&isEnabl			
	ePreRecord=1&preRecordSecs=5&alarmRecordSecs=30			

setIOAlarmConfig

Function	Set IO alarm config			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setIOAlarmConfig			
Param	isEnable	Enable state		
	linkage	IO alarm linkage	bit0:Ring	
			bit1:Send mail	
			bit2:Snap picture	
			bit3:Record	
	alarmLevel	Alarm level,0-Low,1-high,trigger alarm		
	snapInterval	Interval for snap picture		
	triggerInterva	Interval for trigger alarm again		
	1			
	scheduleN	N(0-6), alarm schedule		
Return	Set result(0-success,-1-error)			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=setIOAlarmConfig&usr=admin&pwd=&isEnable=1			
	&linkage=16&snapInterval=2&alarmLevel=1&triggerInterval=5&schedule0=102			
	4&schedule1=1024&schedule2=1024&schedule3=1024&schedule4=1024&sch			
	edule5=1024&schedule6=1024			

getIOAlarmConfig

Function	Get IO alarm config
privilege	admin
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getIOAlarmConfig

Param	None		
Return	isEnable	Enable state	
	linkage	IO alarm linkage	bit0:Ring
			bit1:Send mail
			bit2:Snap picture
			bit3:Record
	alarmLevel	Alarm level Interval for snap picture	
	snapInterval		
	triggerInterva	Interval for trigger alarm again	
	1		
	scheduleN	N(0-6), alarm schedule	
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getIOAlarmConfig&usr=admin&pwd=		

clearIOAlarmOutput

Function	Clean IO alarm output
privilege	admin
Usage	/cgi-bin/CGIProxy.fcgi?cmd=clearlOAlarmOutput
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=clearlOAlarmOutput&usr=admin&pwd=

setPCAudioAlarmCfg

		,
Function	Set audio alarm config for PC(web live video)	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setPCAudioAlarmCfg	
Param	isEnablePCAudi	Enable state
	oAlarm	
Return	Set result(0-success,-1-error)	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=setPCAudioAlarmCfg&usr=admin&pwd=&isEnable	
	PCAudioAlarm=1	

getPCAudioAlarmCfg

Function	Get audio alarm config for PC(web live video)		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getPCAudioAlarmCfg		
Param	None		
Return	isEnablePCAudi	Enable state	
	oAlarm		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getPCAudioAlarmCfg&usr=admin&pwd=		

getMultiDevList

Function	Get multi device list	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcg	i?cmd=getMultiDevList
Param	None	
Return	devN	N(0-8), device information
Note		
Example	/cgi-bin/CGIProxy.fcg	i?cmd=getMultiDevList&usr=admin&pwd=

getMultiDevDetailInfo

Function	Get multi device information		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcg	gi?cmd=getMultiDevDetailInfo	
Param	chnnl	Channel no	
Return	productType	Device type	
	ip	Device IP	
	port	Web port	
	mediaPort	Media port	
	userName	User name	
	passWord	Password	
	devName	Device name	
Note			
Example	/cgi-bin/CGIProxy.fcg	gi?cmd=getMultiDevDetailInfo&usr=admin&pwd=	

addMultiDev

Function	Add multiy device	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcg	i?cmd=addMultiDev
Param	chnnl	Channel no
	productType	Device type
	ip	Device Ip
	port	Web port
	mediaPort	Media port
	userName	User name
	passWord	Password
	devName	Device name
Return	Add result(0-success,-1-error)	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=addMultiDev&usr=admin&pwd=&chnnl=2&product	
	Type=H264&ip=192.168.1.3&port=88&mediaPort=88&userName=admin&pass	
	Word=&devName=FI	9805W

delMultiDev

Function	Delete multiy device	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcg	i?cmd=delMultiDev
Param	chnn1	Channel no
Return	Delete result(0-success,-1-error)	
Note		
Example	/cgi-bin/CGIProxy.fcg	i?cmd=delMultiDev&usr=admin&pwd=&chnnl=2

User account

addAccount

Function	Add user account
privilege	admin

Usage	/cgi-bin/CGIProxy.fcgi?cmd=addAccount		
Param	usrName	user name	
	usrPwd	user passv	word
	privilege	0	Visitor
		1	Operator
		2	Administrator
Return	None		
Note			
Example	/cgi-bin/CGIProxy.fcgi	?cmd=addA	ccount&usrName=test&usrPwd=test&privileg
	e=0& usr=admin&pwd	=	

delAccount

Function	Delete user account	
privilege	admin	
Usage	/cgi-bin/CGIProxy.fcgi?	?cmd=delAccount
Param	usrName	user name
Return	None	
Note		
Example	/cgi-bin/CGIProxy.fcgi?	Pcmd=delAccount&usrName=test&usr=admin&pwd=

changePassword

Function	Change password	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi	?cmd=changePassword
Param	usrName	The user you want to change password
	oldPwd	old password
	newPwd	new password
Return	None	
Note	Admin can change every user's password, visitor and operator can only change	
	their own password	
Example	/cgi-bin/CGIProxy.fcgi?cmd=changePassword&usrName=admin&oldPwd=≠	
	wPwd=test&usr=admi	n&pwd=

changeUserName

Function	Change user name	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=changeUserName	
Param	usrName	The user you want to change name
	newUsrName	The new user name
Return	None	
Note	Admin can change every user's name, visitor and operator can only change their own name	
Example	/cgi-bin/CGIProxy.fcgi?cmd=changeUserName&usrName=admin&	
	newUsrName=newnar	me&usr=admin&pwd=

change User Name And Pwd Together

Function	Change user name and password together		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=changeUserNameAndPwdTogether		
Param	usrName	The user you want to change name	
	newUsrName	New user name	
	oldPwd	old password	
	newPwd	new password	
Return	None		
Note	Admin can change every user's name, visitor and operator can only change		
	their own name		
Example	/cgi-bin/CGIProxy.fcgi?cmd=changeUserNameAndPwdTogether&usrName=ad		
	min&newUsrName=newname&oldPwd=&newPwd=newpwd&usr=admin&pwd=		

logIn

Function	User log in to camera	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd= logIn	
Param	usrName	User name
	remoteIp	Access IP

	groupld	An id use to distinguish different users,can be set to	
		current cpu tick	
	pwd	passwor	d
Return	logInResult	0	Login success
		-1	Parameter check error
		-2	Exceed max user
		-4	User not exist
		-5	Password
		-6	Password error
		-7	Access deny
		-8	Already login
	privilege	0	Visitor
		1	Operator
		2	Administrator
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=logIn&usrName=admin&remoteIp=192.168.1		
	.12&groupId=673982479&pwd=&usr=admin&pwd=		

logOut

Function	User log out to camera	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=logOut	
Param	usrName	User name
	ip	Access IP
	groupId	An id use to distinguish different users,can be set to
		current cpu tick
Return	logOutResult	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=logOut&usrName=admin&ip=192.168.1.12&groupI	
	d=673982479&usr=admin&pwd=	

getSessionList

Function	Get current session list of the camera	
privilege	visitor	

Usage	/cgi-bin/CGIProxy.fcgi?cmd=getSessionList	
Param	None	
Return	usrCnt	session count
	usrN	User name of session N
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getSessionList&usr=admin&pwd=	

getUserList

Function	Get user account list of the camera	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getUserList	
Param	None	
Return	usrCnt	User count
	usrN	User name of accoount N
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getUserList&usr=admin&pwd=	

usrBeatHeart

Function	user checks connection with camera		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=usrBeatHeart		
Param	usrName	User name	
	remotelp	Access IP	
	groupld	An id use to distinguish different users,can be set to	
		current cpu tick	
Return	checkResult(0-success,-1-error)		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=usrBeatHeart&usrName=admin&ip=192.168.1.13		
	&groupId=673982479&usr=admin&pwd=		

PTZ Control

ptzMoveUp

Function	Move up
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveUp
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveUp&usr=admin&pwd=

ptzMoveDown

Function	Move down
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveDown
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveDown&usr=admin&pwd=

ptzMoveLeft

Function	Move to left
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveLeft
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveLeft&usr=admin&pwd=

ptzMoveRight

Function	Move to right
privilege	operator

Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveRight
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveRight&usr=admin&pwd=

ptzMoveTopLeft

Function	Move to top left
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveTopLeft
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveTopLeft&usr=admin&pwd=

ptzMoveTopRight

Function	Move to top right
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveTopRight
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveTopRight&usr=admin&pwd=

ptz Move Bottom Left

Function	Move to bottom left
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveBottomLeft
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveBottomLeft&usr=admin&pwd=

ptz Move Bottom Right

Function	Move to bottom right
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveBottomRight
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzMoveBottomRight&usr=admin&pwd=

ptzStopRun

Function	Stop run PT
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzStopRun
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzStopRun&usr=admin&pwd=

ptzReset

Function	Reset PT to default position
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzReset
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzReset&usr=admin&pwd=

getPTZSpeed

Function	Get the speed of PT
privilege	visitor
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getPTZSpeed

Param	None		
Return	speed	0	Very slow
		1	Slow
		2	Normal speed
		3	Fast
		4	Very fast
Note			
Example	/cgi-bin/C0	GIProxy.fcgi?	cmd=getPTZSpeed&usr=admin&pwd=

setPTZSpeed

Function	Set the sp	Set the speed of PT		
privilege	operator			
Usage	/cgi-bin/C	/cgi-bin/CGIProxy.fcgi?cmd=setPTZSpeed		
Param	speed	0	Very slow	
		1	Slow	
		2	Normal speed	
		3	Fast	
		4	Very fast	
Return	None			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=setPTZSpeed&speed=2&usr=admin&pwd=			

get PTZ Preset Point List

Function	Get all preset point			
privilege	visitor			
Usage	/cgi-bin/C0	/cgi-bin/CGIProxy.fcgi?cmd=getPTZPresetPointList		
Param	None			
Return	cnt Current preset point count			
	pointN	The name of point N		
Note	Our device can support at most 16 preset point			
	We have 4 point default:LeftMost\RightMost\TopMost\BottomMost			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getPTZPresetPointList&usr=admin&pwd=			

ptzAddPresetPoint

Function	Add preset point		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzAddPresetPoint		
Param	name	Preset point name	
Return	None		
Note	The preset point position is current PT position		
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzAddPresetPoint&name=test&usr=admin&pwd		
	=		

ptzDeletePresetPoint

Function	Delete preset point by name		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzDeletePresetPoint		
Param	name	Preset point name	
Return	None		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzDeletePresetPoint&name=test&usr=admin&p		
	wd=		

ptzGotoPresetPoint

Function	Goto preset position			
privilege	operator			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzGotoPresetPoint			
Param	name	Preset point name		
Return	None	None		
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzGotoPresetPoint&name=test&usr=admin&pwd			
	=			

ptzGetCruiseMapList

Function	Get all cruise map list		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzGetCruiseMapList		
Param	None		
Return	cnt Current cruise map point count		
	mapN	The name of map N	
Note	Our device can support at most 8 cruise map		
	We have 2 maps default:Horizental/Vertical		
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzGetCruiseMapList&usr=admin&pwd=		

ptz Get Cruise Map Info

Function	Get the detail info of a cruise map by name		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzGetCruiseMapInfo		
Param	name	name Name of the cruise map	
Return	getResult	0	Success
		-1	Fail
	pointN	The preset	point name of this cruise map
Note	Our device can support at most 8 preset point one cruise map		
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzGetCruiseMapInfo&name=Horizental&usr=ad		
	min&pwd=		

ptzSetCruiseMap

Function	Add a cruise map		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzSetCruiseMap		
Param	name	Name of the cruise map	
	pointN	The name of preset point N	
Return	None		
Note	Our device can support at most 8 preset point one cruise map		
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzSetCruiseMap&name=test&point0=test0&point		
	1=test1&po	pint2=test2&point3=test3&point4=test4&point5=test5&point6=&poin	

t7=&usr=admin&pwd=	
--------------------	--

ptzDelCruiseMap

Function	Delete a cruise map		
privilege	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzDelCruiseMap		
Param	name	Name of the cruise map	
Return	None		
Note			
Example	/cgi-bin/CG	GIProxy.fcgi?cmd=ptzDelCruiseMap&name=test&usr=admin&pwd=	

ptzStartCruise

Function	Start a spec	cificate cruise	
privilege	operator		
Usage	/cgi-bin/CG	IProxy.fcgi?cmd=ptzStartCruise	
Param	mapName	Name of the cruise map	
Return	None		
Note			
Example	/cgi-bin/CG	IProxy.fcgi?cmd=ptzStartCruise&mapName=test&usr=admin&pwd=	

ptzStopCruise

Function	Start current cruise
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=ptzStopCruise
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=ptzStopCruise&usr=admin&pwd=

setCruiseTime

Function	Set time for continue cruise
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setCruiseTime

Param	time	Time for continue cruise
Return	None	
Note		
Example	/cgi-bin/CG	SIProxy.fcgi?cmd=setCruiseTime&time=5&usr=admin&pwd=

getCruiseTime

Function	Set time for continue cruise			
privilege	visitor	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getCuriseTime			
Param				
Return	time	time Time for continue cruise		
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getCuriseTime&usr=admin&pwd=			

setCruiseTimeCustomed

Function	Set time for continue cruise by costomer				
privilege	operator				
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setCruiseTimeCustomed				
Param	time	time Customed time for continue cruise			
	customed	Customed enable state-0-no,1-yes			
Return	None				
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=setCruiseTimeCustomed&time=5&customed=1&u				
	sr=admin&pwd=				

get Cruise Time Customed

Function	Set time for continue cruise by costomer			
privilege	visitor	visitor		
Usage	/cgi-bin/CGIF	/cgi-bin/CGIProxy.fcgi?cmd=getCuriseTimeCustomed		
Param				
Return	time	Customed time for continue cruise		
	customed	Customed enable state-0-no,1-yes		
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getCuriseTimeCustomed&usr=admin&pwd=			

setCruiseLoopCnt

Function	Set counts for continue cruise		
privilege	operator		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setCruiseLoopCnt		
Param	count	Counts for continue cruise	
Return	None		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setCruiseLoopCnt&count=5&usr=admin&pwd=		

getCruiseLoopCnt

Function	Set counts for continue cruise			
privilege	visitor	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getCruiseLoopCnt			
Param				
Return	count	Counts for continue cruise		
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getCruiseLoopCnt&usr=admin&pwd=			

setCruiseCtrlMode

Function	Set control mode for continue cruise, by time or count		
privilege	operator		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setCruiseCtrlMode		
Param	mode	Control mode-0:by time,1:by loop count	
Return	None		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setCruiseCtrlMode&mode=0&usr=admin&pwd=		

getCruiseCtrlMode

Function	Get control mode for continue cruise, by time or count
privilege	visitor
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getCruiseCtrlMode
Param	

Return	mode	Control mode-0:by time,1:by loop count
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getCruiseCtrlMode&usr=admin&pwd=	

set Cruise Pre Point Linger Time

Function	Set linger time for cruise, when pt arrive prepoint		
privilege	operator		
Usage	/cgi-bin/CGIP	roxy.fcgi?cmd=setCruisePrepointLingerTime	
Param	name	Cruise map name	
	timeN	Time for each prepoint	
Return	None		
Note	N:[0-7],max number of prepoints in cruise		
Example	/cgi-bin/CGIProxy.fcgi?cmd=setCruisePrepointLingerTime&name=123&time0=		
	0&time1=1&time2=2&time3=3&time4=4&time5=5&time6=6&time7=7&usr=ad		
	min&pwd=		

getCruisePrePointLingerTime

Function	Set linger time for cruise, when pt arrive prepoint				
privilege	visitor	visitor			
Usage	/cgi-bin/CGIPi	oxy.fcgi?cmd=getCruisePrepointLingerTime			
Param	name	name Cruise map name			
Return	timeN	timeN Time for each prepoint			
Note	N:[0-7],max n	N:[0-7],max number of prepoints in cruise			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getCruisePrepointLingerTime&name=123&usr=a				
	dmin&pwd=				

zoomln

Function	Zoom in
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=zoomIn
Param	None
Return	None
Note	Only supported by the device has zoom lens
Example	/cgi-bin/CGIProxy.fcgi?cmd=zoomIn&usr=admin&pwd=

zoomOut

Function	Zoom out
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=zoomOut
Param	None
Return	None
Note	Only supported by the device has zoom lens
Example	/cgi-bin/CGIProxy.fcgi?cmd=zoomOut&usr=admin&pwd=

zoomStop

Function	Stop zoom run
privilege	operator
Usage	/cgi-bin/CGIProxy.fcgi?cmd=zoomStop
Param	None
Return	None
Note	Only supported by the device has zoom lens
Example	/cgi-bin/CGIProxy.fcgi?cmd=zoomStop&usr=admin&pwd=

getZoomSpeed

Function	Get the speed of Zoom					
privilege	visitor	visitor				
Usage	/cgi-bin/C0	SIProxy.fcgi?	cmd=getZoomSpeed			
Param	None	None				
Return	speed	speed 0 Slow				
		1 Normal				
		2	Fast			
Note	Only supported by the device has zoom lens					
Example	/cgi-bin/CGIProxy.fcgi?cmd=getZoomSpeed&usr=admin&pwd=					

setZoomSpeed

Function	Set the speed of PTZ	
privilege	operator	

Usage	/cgi-bin/CGIProxy.fcgi?cmd=setZoomSpeed			
Param	speed	eed 0 Slow		
		1	Normal	
		2	Fast	
Return	None	None		
Note	Only supported by the device has zoom lens			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setZoomSpeed&usr=admin&pwd=&speed=1			

setPTZSelfTestMode

Function	Set the selftest mode of PTZ						
privilege	operator	operator					
Usage	/cgi-bin/C	GIProxy.fcg	i?cmd= se	etPTZSelfTes	tMode		
Param	mode	node 0 No selftest					
		1	Normal selftest				
		2	After	normal	selftest,	then	goto
	presetpoint-appointed						
Return	None						
Note	Only supported by ipc that can enable ptz-selftest						
Example	/cgi-bin/CGIProxy.fcgi?usr=admin&pwd=&cmd=setPTZSelfTestMode&mod						
	e=2	e=2					

getPTZSelfTestMode

Function	Get the selftest mode of PTZ						
privilege	visitor						
Usage	/cgi-bin/C	GIProxy.fo	cgi?cmd= ge	etPTZSelfTes	tMode		
Param	None						
Return	mode	0	No selft	est			
		1	Normal	selftest			
		2	After	normal	selftest,	then	goto
			presetp	oint-appointe	d		
Return	None						
Note	Only supported by ipc that can enable ptz-selftest						
Example	/cgi-bin/C	GIProxy.fo	cgi?usr=adn	nin&pwd=&cr	md=getPTZSe	elfTestMode	

setPTZPrePointForSelfTest

Function	Set presetpoint for selftest of PTZ				
privilege	operator	operator			
Usage	/cgi-bin/C0	GIProxy.fcgi?cmd= setPTZPrePointForSelfTest			
Param	name	name Preset point name			
Return	None	None			
Note	Only supp	Only supported by ipc that can enable ptz-selftest-2			
Example	/cgi-bin/CGIProxy.fcgi?usr=admin&pwd=&cmd=setPTZPrePointForSelfTes				
	t&name=T	t&name=TopMost			

get PTZ Pre Point For Self Test

Function	Get the presetpoint for selftest of PTZ				
privilege	visitor				
Usage	/cgi-bin/C0	GIProxy.fcgi?cmd= getPTZPrePointForSelfTest			
Param	None	None			
Return	name	name Preset point name			
Note	Only supp	Only supported by ipc that can enable ptz-selftest			
Example	/cgi-bin/CGIProxy.fcgi?usr=admin&pwd=&cmd=getPTZPrePointForSelfTes				
	t	t			

set485Info

Function	Set informations of 485				
privilege	operator				
Usage	/cgi-bin/CGIProx	y.fcgi?cmd=set485Info			
Param	rs485Protocol	Protocol			
	rs485Addr	Address			
	rs485Baud	Baud rate			
	rs485DataBit DataBit				
	rs485StopBit StopBit				
	rs485Check	Parity			
Return	None				
Note	Only supported by ipc that can enable 485				
Example	/cgi-bin/CGIProxy.fcgi?usr=admin&pwd=&cmd=set485Info&rs485Protocol				
	=0&rs485Addr=1&rs485Baud=1200&rs485DataBit=7&rs485StopBit=1&rs				

	485Check=0	
	TOOOTICOK O	- 1

get485Info

Function	Get informations of 485				
privilege	Visitor				
Usage	/cgi-bin/CGIProx	y.fcgi?cmd=get485Info			
Param	None	None			
Return	rs485Protocol	Protocol			
	rs485Addr Address				
	rs485Baud Baud rate				
	rs485DataBit DataBit				
	rs485StopBit	StopBit			
	rs485Check	rs485Check Parity			
Note	Only supported by ipc that can enable 485				
Example	/cgi-bin/CGIProxy.fcgi?usr=admin&pwd=&cmd=get485Info				

Network

getlPInfo

Function	Get IP Info				
privilege	visitor				
Usage	/cgi-bin/C0	GIProxy.fcgi?cmd=getIPInfo			
Param	None	None			
Return	isDHCP	Obtain ip from dhcp server or not			
	ip	ip address(Can only support ipv4 yet)			
	gate	gate gateway("0.0.0.0" when use dhcp)			
	mask subnet mask				
	dns1	The first dns server addr("0.0.0.0" when use dhcp)			
	dns2	The second dns server addr("0.0.0.0" when use dhcp)			
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=getIPInfo&usr=admin&pwd=				

setIpInfo

Function	Set IP Info	Set IP Info			
privilege	admin	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setIpInfo				
Param	isDHCP Obtain ip from dhcp server or not				
	ip	ip address(Can only support ipv4 yet)			
gate gateway		gateway			
	mask	subnet mask			
	dns1	The first dns server addr			
dns2 The second dns server addr		The second dns server addr			
Return	None				
Note	System will reboot automatically to take effect after call this CGI command				
Example	/cgi-bin/CGIProxy.fcgi?cmd=setIpInfo&isDHCP=0&ip=192.168.1.88&gate=192				
	.168.1.1&mask=255.255.255.0&dns1=192.168.1.1&dns2=192.168.1.1&usr=a				
	dmin&pwd=				

refreshWifiList

Function	Start scan the aps around			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=refreshWifiList			
Param	None			
Return	None			
Note	This operation may takes a while, about 20 seconds or above, the other operation on this device will be blocked during the period.			
Example	/cgi-bin/CGIProxy.fcgi?cmd=refreshWifiList&usr=admin&pwd=			

getWifiList

Function	Get the aps around after refreshWifiList				
privilege	admin	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getWifiList				
Param	startNo The start NO of the ap list you want to get.				
		For example:The are 30 aps around you, you want to look at the			
		last ten aps, then startNo=20			
Return	totalCnt	talCnt Total count of aps			

	curCnt	Current aps count			
	apN	The detail info of ap N	ssid	AP name	
		Format:	mac	AP's	mac address
		ssid+mac+quality+isEncryp	quality	Sign	al quality(0~100)
		t+encrypType	isEncrypt	Encr	ypt or not
			encrypType	0	Open mode
				1	WEP
				2	WPA
				3	WPA2
				4	WPA/WPA2
Note	Only 10 aps	y 10 aps will be returned one time			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getWifiList&startNo=0&usr=admin&pwd=				

setWifiSetting

Function	Set wifi config			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setWifiSetting			
Param	isEnable	Enable state		
	isUseWifi	Use wifi or not		
	ssid	AP name		
	netType	0	Infra net	
		1	Ad-hoc Not supported yet	
	encryptTyp	0	Open mode	
	е	1	WEP	
		2	WPA	
		3	WPA2	
		4	WPA/WPA2	
	psk	The psk of	WPA WPA2	
	authMode	0	Open mode	
		1	Shared key	
		2	Auto mode	
	keyFormat	0	ASIC	
		1	Hex	
	defaultKey	1~4		
	key1			
	key2			

	key3			
key4				
	key1Len	64 or 128		
key2Len 64 or 128		64 or 128		
	key3Len	64 or 128		
	key4Len	64 or 128		
Return	None			
Note Camera will not connect to AP unless you enject your cable		not connect to AP unless you enject your cable		
Example	/cgi-bin/CGIProxy.fcgi?cmd=setWifiSetting&isEnable=1&isUseWifi=1&ssid=fosta			
	r_soft&netType=0&encryptType=4&psk=software&authMode=0&keyFormat=0&d			
	efaultKey=1&key1=&key2=&key3=&key4=&key1Len=64&key2Len=64&key3Len			
	=64&key4Le	n=64&usr=admin&pwd=		

getWifiConfig

Function	Get wifi config			
privilege	admin			
Usage	/cgi-bin/CGIF	Proxy.fcgi?cn	nd=getWifiConfig	
Param	None			
Return	isEnable	Enable state		
	isUseWifi	Use wifi or not		
	isConnecte d	Connected	state	
	connected Ap	Connedted ap		
	ssid	AP name		
	encryptTyp	0	Open mode	
	е	1	WEP	
		2	WPA	
		3	WPA2	
		4	WPA/WPA2	
	psk	The psk of WPA WPA2		
	authMode	0	Open mode	
		1	Shared key	
		2	Auto mode	
	keyFormat	0	ASIC	
		1	Hex	

	defaultKey	1~4	
	key1		
	key2		
	key3		
	key4		
	key1Len	64 or 128	
	key2Len	64 or 128	
	key3Len	64 or 128	
	key4Len	64 or 128	
Return	None		
Note Camera will not connect to AP unless you enject your cable			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getWifiConfig&usr=admin&pwd=		

getPortInfo

Function	Get ports of camera				
privilege	visitor				
Usage	/cgi-bin/CGIF	Proxy.fcgi?cmd=getPortInfo			
Param	None	None			
Return	webPort http port(default value is 88)				
	httpsPort https port(default value is 443)				
	mediaPort	media port(default value is 88)			
	onvifPort	Onvif Port(default value is 888)			
Note	.You can call this CGI command without usr or pwd section				
	.onvifPort param only for onvif camera, the camra which does not has onvif				
	function does not have this param				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getPortInfo&usr=admin&pwd=				

setPortInfo

Function	Set ports of camera			
privilege	admin			
Usage	/cgi-bin/CGIF	/cgi-bin/CGIProxy.fcgi?cmd=getPortInfo		
Param	webPort http port(default value is 88)			
	mediaPort media port(default value is 88)			
	httpsPort https port(default value is 443)			
	onvifPort Onvif Port(default value is 888)			

Return	None
Note	.Re login is needed after call this CGI command
	onvifPort param only for onvif camera, the camra which does not has onvif
	function does not have this param
Example	/cgi-bin/CGIProxy.fcgi?cmd=setPortInfo&webPort=88&mediaPort=88&httpsPo
	rt=443&onvifPort=888&usr=admin&pwd=

getUPnPConfig

Function	Get UpnP config			
privilege	visitor			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getUPnPConfig			
Param	None			
Return	isEnable	isEnable is Enable UpnP function		
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getUPnPConfig&usr=admin&pwd=			

setUPnPConfig

Function	Set UpnP config				
privilege	admin				
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setUPnPConfig				
Param	isEnable	isEnable is Enable UpnP function			
Return	None				
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=setUPnPConfig&isEnable=1&usr=admin&pwd=				

getDDNSConfig

Function	Get DDNS config				
privilege	visitor	visitor			
Usage	/cgi-bin/CGIPro	oxy.fcgi?cmd=@	getDDNSConfig		
Param	None	None			
Return	isEnable	is Enable DDNS update			
	hostName	DDNS domain			
	ddnsServer	0	Factory DDNS		
		1	Oray		

		2	3322
		3	no-ip
		4	dyndns
	user	user name	
	password	password	
	factoryDDNS	factory ddns	
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getDDNSConfig&usr=admin&pwd=		

setDDNSConfig

Function	Set DDNS config			
privilege	admin			
Usage	/cgi-bin/CGIPi	oxy.fcgi?cr	nd=setDDNSConfig	
Param	isEnable	is Enable DDNS update		
	hostName	DDNS d	omain	
	ddnsServer	0	Factory DDNS	
		1	Oray	
		2	3322	
		3	no-ip	
		4	dyndns	
	user	user name		
	password	password		
Return	None			
Note	This command can only be used to set the third party ddns			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setDDNSConfig&isEnable=1&hostName=test.dyn			
	dns.org&ddnsServer=4&user=test&password=test&usr=admin&pwd=			

setFtpConfig

Function	Set FTP config			
privilege	admin			
Usage	/cgi-bin/CGIPro	/cgi-bin/CGIProxy.fcgi?cmd=setFtpConfig		
Param	ftpAddr	FTP server address, you can contain sub directory in it		
	ftpPort	FTP port		
	mode	0	PASV mode	
		1	PORT mode	

	userName	user name	
	password	password	
Return	None		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setFtpConfig&ftpAddr=ftp://192.168.1.2/sbuDir&ft		
	pPort=21&mode=0&userName=test&password=test&usr=admin&pwd=		

getFtpConfig

Function	Get FTP config				
privilege	visitor	visitor			
Usage	/cgi-bin/CGIPr	oxy.fcgi?cmd	=getFtpConfig		
Param	None	None			
Param	ftpAddr FTP server address, you can contain sub directory in it				
	ftpPort	FTP port			
	mode	0	PASV mode		
		1	PORT mode		
	userName	user name	user name		
	password	password			
Note		·			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getFtpConfig&usr=admin&pwd=				

testFtpServer

Function	Test FTP server				
privilege	visitor	visitor			
Usage	/cgi-bin/CGIP	roxy.fcgi?cmd=	testFtpServer		
Param	ftpAddr	FTP server address, you can contain sub directory in it			
	ftpPort	FTP port			
	mode	0	PASV mode		
		1	PORT mode		
	userName user name				
	password	password			
Return	testResult	0	Success		
		-1	Fail		
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=testFtpServer&ftpAddr=ftp://192.168.1.2/sbuDir&f				

tnDort-010 mode-00 userNeme-teet0 necessard-teet0 uer-edmin0 nud-
tpPort=21&mode=0&userName=test&password=test&usr=admin&pwd=

getSMTPConfig

Function	Get mail config			
privilege	visitor			
Usage	/cgi-bin/CGIPr	oxy.fcgi?cm	d=getSMTPConfig	
Param	None			
Return	isEnable	is enable	camera send mail?	
	server	SMTP ser	ver address	
	port	smtp port		
	isNeedAuth	Need auth user account or not		
	tls	0 None		
		1 TLS 2 STARTTLS		
	user	user name	9	
	password	password		
	sender	Use "," between 2 senders, for exapler:		
	reciever			
		aaa@123.com,bbb@456.com		
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getSMTPConfig&usr=admin&pwd=			

setSMTPConfig

Function	Get mail config				
privilege	admin				
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setSMTPConfig				
Param	isEnable	is enable c	is enable camera send mail?		
	server	SMTP serv	ver address		
	port	smtp port			
	isNeedAuth	Need auth user account or not			
	tls	0 None			
		1 TLS			
		2 STARTTLS			
	user	user name			
	password	password			

	sender			
	reciever	Use "," between 2 senders, for exapler:		
		aaa@123.com,bbb@456.com		
Return	None			
Note				
Example	/cgi-bin/CGIPro	oxy.fcgi?cmd=setSMTPConfig&isEnable=1&server=smtp.gmail.		
	com&port=587&isNeedAuth=1&user=test&password=test&send=test@gmail.c			
	om&reciever=a	aa@123.com,bb@456.com&usr=admin&pwd=		

smtpTest

Function	Test mail setting				
privilege	admin				
Usage	/cgi-bin/CGIProxy.fcgi?cmd=smtpTest				
	smtpServer	SMTP ser	ver address		
	port	smtp port			
	isNeedAuth	Need auth	user account or not		
	tls	0	0 None		
		1	TLS		
		2	STARTTLS		
	user	user name			
	password	password			
Return	testResult	0	Success		
		-1	Fail		
Note	You must call setSMTPConfig firstly.				
	We will send a test mail to all recievers				
Example	/cgi-bin/CGIProxy.fcgi?cmd=smtpTest&smtpServer=smtp.gmail.com&port=587				
	&isNeedAuth=1&user=test&password=test&usr=admin&pwd=				

setP2PEnable

Function	Set p2p status			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setP2PEnable			
	enable	enable 0 Disable		
		1	Enable	
Return	None			

Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=setP2PEnable&enable=1&usr=admin&pwd=

getP2PEnable

Function	Get p2p status				
privilege	visitor				
Usage	/cgi-bin/CG	/cgi-bin/CGIProxy.fcgi?cmd=getP2PEnable			
Param	None				
	enable	enable 0 Disable			
	1 Enable				
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=getP2PEnable&usr=admin&pwd=				

setP2PPort

Function	Set p2p port				
privilege	admin				
Usage	/cgi-bin/CGIPro	oxy.fcgi?cmd=setP2PPort			
	port	ort P2P port number			
Return	None				
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=setP2PPort&port=12345&usr=admin&pwd=				

getP2PPort

Function	Get p2p port			
privilege	visitor			
Usage	/cgi-bin/CGIPro	/cgi-bin/CGIProxy.fcgi?cmd=getP2PPort		
Param	None			
	port P2P port number			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getP2PPort&usr=admin&pwd=			

Device manage

setSystemTime

Function	Set system time			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setSystemTime			
Param	timeSource	0	Get time from NTP server	
		1	Set time manually	
	ntpServer	ntp server ac	ddr	
		Support ntp	server:	
		time.nist.gov	time.kriss.re.kr time.windows.com	
		time.nuri.net		
	dateFormat	0	YYYY-MM-DD	
		1	DD/MM/YYYY	
		2	MM/DD/YYYY	
	timeFormat	0	12 hours	
		1	24 hours	
	timeZone	The seconds between local time and GMT time.		
		For example: timeZone=3600 presents GMT-01:00		
			timeZone=-3600 presents GMT+01:00	
	isDst	Daylight sav	ing time (0-disable,1-enable)	
	dst	Not in use cu	urrently	
	year			
	month			
	day			
	hour			
	min			
	sec			
Return	None			
Note	This command	This command can only be used to set the third party ddns		
Example	/cgi-bin/CGIPr	oxy.fcgi?cmd=	setSystemTime&timeSource=1&ntpServer=&date	
	Format=0&timeFormat=0&timeZone=0&isDst=0&dst=0&year=2012&mon=1&			
day=6&hour=9&minute=35&sec=0&usr=admin			sec=0&usr=admin&pwd=	

getSystemTime

Function	Get system time			
privilege	visitor			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getSystemTime			
Param	None			
Return	timeSource	0	Get time from NTP server	
		1	Set time manually	
	ntpServer	ntp server a	ddr	
		Support ntp	server:	
		time.nist.go	v time.kriss.re.kr time.windows.com	
		time.nuri.ne	ıt	
	dateFormat	0	YYYY-MM-DD	
		1	DD/MM/YYYY	
		2	MM/DD/YYYY	
	timeFormat	0	12 hours	
		1	24 hours	
	timeZone	The seconds between local time and GMT time.		
		For example: timeZone=3600 presents GMT-01:00		
		timeZone=-3600 presents GMT+01:00		
	isDst	Daylight saving time (0-disable,1-enable)		
	dst	Not in use of	currently	
	year			
	month			
	day			
	hour			
	min			
	sec			
Note	This command can only be used to set the third party ddns			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getSystemTime&usr=admin&pwd=			

openInfraLed

Function	Force open infra led
privilege	admin
Usage	/cgi-bin/CGIProxy.fcgi?cmd=openInfraLed
Param	None

Return	ctrlResult	0	Success
		-1	Fail
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=openInfraLed&usr=admin&pwd=		

closeInfraLed

Function	Force close infra led			
privilege	admin	admin		
Usage	/cgi-bin/CGIF	/cgi-bin/CGIProxy.fcgi?cmd=closeInfraLed		
Param	None			
Return	ctrlResult	0	Success	
		-1	Fail	
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=closeInfraLed&usr=admin&pwd=			

getInfraLedConfig

Function	Get infra led config			
privilege	visitor	visitor		
Usage	/cgi-bin/CG	/cgi-bin/CGIProxy.fcgi?cmd=getInfraLedConfig		
Param	None			
Return	mode	0	Auto mode	
		1	Manual mode	
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getInfraLedConfig&usr=admin&pwd=			

setInfraLedConfig

Function	Set infra led config			
privilege	admin	admin		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setInfraLedConfig&mode=0			
Param	mode	0	Auto mode	
		1	Manual mode	
Return	None			
Note				

Example	/cgi-bin/CGIProxy.fcgi?cmd=setInfraLedConfig&mode=&usr=admin&pwd=

getScheduleInfraLedConfig

Function	Get config for infra led switch schedule			
privilege	visitor	visitor		
Usage	/cgi-bin/CGIPro	oxy.fcgi?cmd=getScheduleInfraLedConfig		
Param	None	None		
Return	startHourN	startHourN Start hour		
	startMinN	startMinN Start Minitue		
	endHourN	endHourN End hour		
	endMinN End minitue			
Note	N:[0-2],the number of infra led switch schedule			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getScheduleInfraLedConfig&usr=admin&pwd=			

setScheduleInfraLedConfig

Function	Set config for infra led switch schedule			
privilege	admin			
Usage	/cgi-bin/CGIPro	oxy.fcgi?cmd=setScheduleInfraLedConfig&mode=0		
Param	startHourN	startHourN Start hour		
	startMinN	Start Minitue		
	endHourN	endHourN End hour		
	endMinN End minitue			
Return	None			
Note	N:[0-2],the number of infra led switch schedule			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setInfraLedConfig&mode=&usr=admin&pwd=			

getDevState

Function	Get all device state			
privilege	visitor	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getDevState			
Param	None			
Return	IOAlarm	0	Disabled	
		1	No alaram	
		2	Detect alarm	

			1
	motionDetectAlar	0	Disabled
	am	1	No alarm
		2	Detect alarm
	soundAlarm	0	Disabled
		1	No alarm
		2	Detect alarm
	record	0	Not in recording
		1	Recording
	sdState	0	No sd card
		1	Sd card ok
		2	Sd card read only
	sdFreeSpace	Free spa	ce of sd card by unit of k
	sdTotalSpace	Total spa	ace of sd card by unit of k
	ntpState	0	Disabled
		1	Update success
	ddnspState	2	Update fail
		0	Disabled
		1	Update success
		2	Update fail
	url	DDNS ui	1
	upnpState	0	Disabled
		1	Update success
		2	Update fail
	isWifiConnected	0	No wifi connected
		1	Connected
	wifiConnectedAP infraLedState	The ssid	of the ap which has been connected
		0	OFF
		1	ON
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getDevState&usr=admin&pwd=		

getDevName

Function	Get camera name
privilege	visitor
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getDevName
Param	None

Return	devName	Camera name
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getDevName&usr=admin&pwd=	

setDevName

Function	Set camera name			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setDevName			
Param	devName	devName Camera name		
Return	None			
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=setDevName&devName=test&usr=admin&pwd=			

getDevInfo

Function	Get camera information	
privilege	visitor	
Usage	/cgi-bin/CGIPro	oxy.fcgi?cmd=getDevInfo
Param	None	
Return	productNam e	Camera model
	serialNo	Serial no
	devName	Camera name
	mac	Mac address
	year	
	mon	
	day	
	hour	
	min	
	sec	
	timeZone	Time zone
	firmwareVer	Firmware version
	hardwareVer	Hardware version
Note		

Example	/cgi-bin/CGIProxy.fcgi?cmd=getDevInfo&usr=admin&pwd=

getProductModel

Function	Get camera model number	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductModel	
Param	None	
Return	model	Camera model number
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductModel&usr=admin&pwd=	

getProductModelName

Function	Get camera model name	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductModelName	
Param	None	
Return	modelName	Camera model name
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductModelName&usr=admin&pwd=	

getProductLanguage

Function	Get camera main language	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductLanguage	
Param	None	
Return	language	Camera main language
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductLanguage&usr=admin&pwd=	

getProductSensorType

Function	Get camera sensor type number	
privilege	visitor	

Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductSensorType	
Param	None	
Return	sensorType	Camera sensor type number
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductSensorType&usr=admin&pwd=	

getProductWifiType

Function	Get camera wifi type number	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductWifiType	
Param	None	
Return	wifiType	Camera wifi type number
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductWifiType&usr=admin&pwd=	

getProductSdFlag

Function	Whether camera support sd card	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductSdFlag	
Param	None	
Return	sdFlag	Camera flag to support sd card-0:no,1:yes
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductSdFlag&usr=admin&pwd=	

getProductOutdoorFlag

Function	Whether camera is outdoor machine	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductOutdoorFlag	
Param	None	
Return	OutdoorFlag Whether camera is outdoor machine-0:no,1:yes	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductOutdoorFlag&usr=admin&pwd=	

getProductPtFlag

Function	Whether camera is pt machine	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductPtFlag	
Param	None	
Return	ptFlag	Whether camera is pt machine-0:no,1:yes
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductPtFlag&usr=admin&pwd=	

getProductZoomFlag

Function	Whether camera is zoom machine	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductZoomFlag	
Param	None	
Return	zoomFlag	Whether camera is zoom machine-0:no,1:yes
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductZoomFlag&usr=admin&pwd=	

getProductRs485Flag

Function	Whether camera support rs485	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductRs485Flag	
Param	None	
Return	rs485Flag Whether camera support rs485-0:no,1:yes	
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductRs485Flag&usr=admin&pwd=	

getProductIoAlarmFlag

Function	Whether camera support IO alarm
privilege	visitor
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductIoAlarmFlag
Param	None

Return	ioAlarmFlag	Whether camera support IO alarm-0:no,1:yes
Note		
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductIoAlarmFlag&usr=admin&pwd=	

getProductOnvifFlag

Function	Whether camera support Onvif			
privilege	visitor			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductOnvifFlag			
Param	None			
Return	onvifFlag	onvifFlag Whether camera support onvif-0:no,1:yes		
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductOnvifFlag&usr=admin&pwd=			

getProductP2pFlag

Function	Whether camera support P2p		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductP2pFlag		
Param	None		
Return	p2pFlag	p2pFlag Whether camera support p2p-0:no,1:yes	
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductP2pFlag&usr=admin&pwd=		

getProductWpsFlag

Function	Whether camera support Wps		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductWpsFlag		
Param	None		
Return	wpsFlag	wpsFlag Whether camera support p2p-0:no,1:yes	
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductWpsFlag&usr=admin&pwd=		

getProductAudioFlag

Function	Whether camera support audio-speak		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductAudioFlag		
Param	None		
Return	audioFlag Whether camera support audio for speak-0:no,1:yes		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductAudioFlag&usr=admin&pwd=		

getProductTalkFlag

Function	Whether camera support audio-talk		
privilege	visitor		
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductTalkFlag		
Param	None		
Return	talkFlag	talkFlag Whether camera support audio for talk-0:no,1:yes	
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductTalkFlag&usr=admin&pwd=		

getProductAppVer

Function	Get camera application version		
privilege	visitor	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductAppVer		
Param	None		
Return	appVer camera application version		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getProductAppVer&usr=admin&pwd=		

getProductAllInfo

Function	Get camera Information
privilege	visitor
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getProductAllInfo
Param	None

Return	model	Model number
	modelName	Model Name
	language	Main language
	sensorType	Sensor type number
	wifiType	Wifi Type Number
	reserve1	Reserve
	reserve2	Reserve
	reserve3	Reserve
	reserve4	Reserve
	sdFlag	Whether machine support sd card
	outdoorFlag	Whether machine is outdoor
	ptFlag	Whether machine support pt
	zoomFlag	Whether machine support zoom
	Rs485Flag	Whether machine support rs485
	ioAlarmFlag	Whether machine support io alarm
	onvifFlag	Whether machine support onvif
	p2pFlag	Whether machine support p2p
	wpsFlag	Whether machine support wps
	audioFlag	Whether machine support audio-speak
	talkFlag	Whether machine support audio-talk
	reserveFlag1	reserve
	reserveFlag2	reserve
	reserveFlag3	reserve
	reserveFlag4	reserve
	appVer	Camera application version
Note		
Example	/cgi-bin/CGIProxy	fcgi?cmd=getProductAllInfo&usr=admin&pwd=

getGeneratePubKey

Function	Get public key generated by camera for software reset
privilege	visitor
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getGeneratePubKey
Param	None

Return	genResult	The result that camera generate public key for software reset	
	genPubLen	The length of public key	
	pubKey	Public key	
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=getGeneratePubKey&usr=admin&pwd=		

toolResetToFactory

Function	Set camera reset to factory by software				
privilege	visitor				
Usage	/cgi-bin/CGIProxy.fcgi?cmd=toolResetToFactory				
Param	codeLen	codeLen Code length for camera reset			
	code	Code for camera reset			
Return	restoreResult	The result that camera reset			
Note					
Example	/cgi-bin/CGIProxy.fcgi?cmd=toolResetToFactory&codeLen=10&code=xxxxxxx				
	xxx&&usr=admin&pwd=				

System

rebootSystem

Function	Reboot camera
privilege	admin
Usage	/cgi-bin/CGIProxy.fcgi?cmd=rebootSystem
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd=rebootSystem&usr=admin&pwd=

restoreToFactorySetting

Function	Restore to factory setting	
privilege	admin	

Usage	/cgi-bin/CGIProxy.fcgi?cmd=restoreToFactorySetting
Param	None
Return	None
Note	
Example	/cgi-bin/CGIProxy.fcgi?cmd= restoreToFactorySetting&usr=admin&pwd=

exportConfig

Function	Export config file				
privilege	admin	admin			
Usage	/cgi-bin/CGIPro	/cgi-bin/CGIProxy.fcgi?cmd=exportConfig			
Param	None				
Return	fileName	fileName The config name			
Note	After call this command, you can get the config file by visit the following addr: /configs/export/configs.bin				
Example	/cgi-bin/CGIProxy.fcgi?cmd=exportConfig&usr=admin&pwd=				

ImportConfig

Function	Import config file					
privilege	admin					
Usage	/cgi-bin/CGIProxy.fcgi?cmd=importConfig&usr=admin&pwd=					
Param	None					
Return	None					
Note	System will reboot automatically after this operation					
Example	<form <="" enctype="multipart/form-data" method="post" name="form5" target="retframe" td=""></form>					
	action="cgi-bin/ CGIProxy.fcgi?cmd=importConfig&usr=admin&pwd=" >					
	<input name="setting_file" type="file"/>					
	<input type="submit" value="import"/>					

FwUpgrade

Function	Upgrade firmware
privilege	admin

Usage	/cgi-bin/CGIProxy.fcgi?cmd=fwUpgrade&usr=admin&pwd=		
Param	None		
Return	upgradeResu	0	Upgrade success
	It	-1	Upgrade fail
Note	System will reboot automatically after this operation.		
	This action may takes about 120s when upgrade app firmware, takes about		
	60s when upgrade system firmware		
Example	<form <="" enctype="multipart/form-data" method="post" name="form5" target="retframe" th=""></form>		
	action="cgi-bin/ CGIProxy.fcgi?cmd=fwUpgrade&usr=admin&pwd=" >		
	<input name="fw_file" type="file"/>		
	<input type="submit" value="upgrade"/>		

MISC

getFirewallConfig

Function	Get firewall config			
privilege	visitor	visitor		
Usage	/cgi-bin/CGIPro	/cgi-bin/CGIProxy.fcgi?cmd=getFirewallConfig		
Param	None			
Return	isEnable	Use firewall or not		
	rule	0	The ip list can't access	
		1	Only allow the ip list to access	
	ipListN	The ip address(Network address) of list N		
Note				
Example	/cgi-bin/CGIProxy.fcgi?cmd=getFirewallConfig&usr=admin&pwd=			

setFirewallConfig

Function	Set firewall config			
privilege	admin			
Usage	/cgi-bin/CGIProxy.fcgi?cmd=setFirewallConfig			
Param	isEnable	sEnable Use firewall or not		
	rule	0	The ip list can't access	

		1	Only allow the ip list to access
	ipListN	The i	p address(Network address) of list N
Return	None		
Note			
Example	/cgi-bin/CGIProxy.fcgi?cmd=setFirewallConfig&isEnable=1&rule=0&ipList0=0		
	&ipList1=0&ipList2=0&ipList3=0&ipList4=0&ipList5=0&ipList6=0&ipList7=0&us		
	r=admin&pwd=		

getLog

Function	Get system log	
privilege	visitor	
Usage	/cgi-bin/CGIProxy.fcgi?cmd=getLog	
Param	offset	Where you want to start get log
	count	How many logs you want to get, must less then 20
Return	totalCnt	Total log count
	curCnt	current log count
	logN	log information, consist by
		time+user+ip+logID
Note	We can have 1000 record of log at most.	
	We can get 10 log at most one time	
Example	/cgi-bin/CGIProxy.fcgi?cmd=getLog&offset=0&count=20&usr=admin&pwd=	

^{*}logID:

- 0:System power on
- 1:Detect motion alarm
- 2:user login
- 3:user logout
- 4:user off line
